

Safeguard your digital displays

with SurgeX power protection and conditioning solutions

Engineered to specifically address the noise interference and power protection needs of digital displays.

The SurgeX Advantage

SurgeX offers a full range of products to protect equipment from the adverse effects of power fluctuations. Our digital display solutions are ideally suited for the sophisticated equipment used in today's flat panel systems. SurgeX technology is superior to the single-stage MOV circuitry found in conventional surge protectors, ensuring the highest level of protection from damaging surges, spikes, over voltage, EMI/RFI noise, and electrical transients. It is completely non-sacrificial and never requires reset, increasing the lifespan and reliability of connected equipment. Available in two, four, and six receptacle configurations, including a model with remote IP control capabilities. We offer a solution to safeguard any digital panel display.

Make the choice to reduce equipment damage, capital expenditures, lost revenue, and downtime with top-of-the-line digital display solutions from SurgeX.

Advanced Power Protection

- Superior to conventional single-stage circuitry
- 100% fail-safe non-sacrificial protection
- Never requires reset
- Improves audio video performance

Additional Technologies

- Impedance Tolerant EMI/RFI filter
- Over voltage shutdown
- Remote IP capabilities (FlatPak AR model)
- Diagnostic software (MultiPak models)

Benefits

- Increases the reliability of connected equipment
- Reduces disruptions, downtime, and service costs
- Reduces unnecessary parts and equipment replacement costs
- Lifetime product and 5 year connected equipment warranty
